Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13, 15-19, 21, 23-25, 28-36, 38-47 and 49-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB '092 in view of GB '388 and Reichert et al.

This rejection is maintained for reasons of record. Applicants' newly added limitation to addition of the stabilizing additive via homogenization is not seen as distinguishing over the prior art. This limitation is seen as simply stating that the additive is mixed with the other ingredients. Applicants should point out where homogenization is defined in a manner which distinguishes from a simple mixing operation.

Claims 20, 22 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14, 26²⁷ and 48 are allowed.
